PERSONNEL HEALTH EXAMINATIONS/COMMUNICABLE DISEASES

All employees, prior to entering service, will present a certificate showing a satisfactory health record. Employees will inform the superintendent whenever they contract a contagious or communicable disease.

No employee who has any communicable disease will perform his/her duties in any location where such might endanger the health of school children. The Board will require any employee to submit to a physical examination by a physician whenever there is reason to believe that the employee has any communicable disease.

The superintendent will reassign or suspend any employee who is suspected of having a communicable disease which might endanger the health of children, pending investigation and final disposition of the case before the Board.

To assist the Board in making a final disposition of the case, the superintendent may refer the case to the County Health Office or other medical experts.

After the initial certification, employees performing duties such as bus drivers or cafeteria workers will be required to provide timely certifications as federal or state law or regulations require. Other employees will not be required to provide certifications unless there is a break in service of twelve months or more.
