### TEXTBOOK SELECTION PROCESS

The superintendent and/or members of his/her staff will develop an administrative procedure that governs the selection of textbooks in the Sevier County School System. This procedure will adhere to the requirements of state law concerning the selection of textbooks and will utilize the best processes in selecting the best, most appropriate textbooks for use in the school system.

At a minimum, several teachers that could be expected to use the textbook after selection and instructional supervisors will be involved in the process.
