SAFETY POLICY - MEDICAL PANEL

The workers' compensation administrator in the school district will establish a medical panel consisting of at least three (3) general practitioners as required by the TSBA's Workers' Compensation Trust, policy DB.

The names of the general practitioners will be posted in conspicuous places throughout maintenance, transportation, clerical, and professional areas of all schools. Any workers' compensation claimant may choose from any of the general practitioners listed on the medical panel for treatment of on-the-job injuries. Any specialized treatment for such injuries must be administered by practitioners or specialists referred by the medical panel.
